

CEPILLOS REGIOS

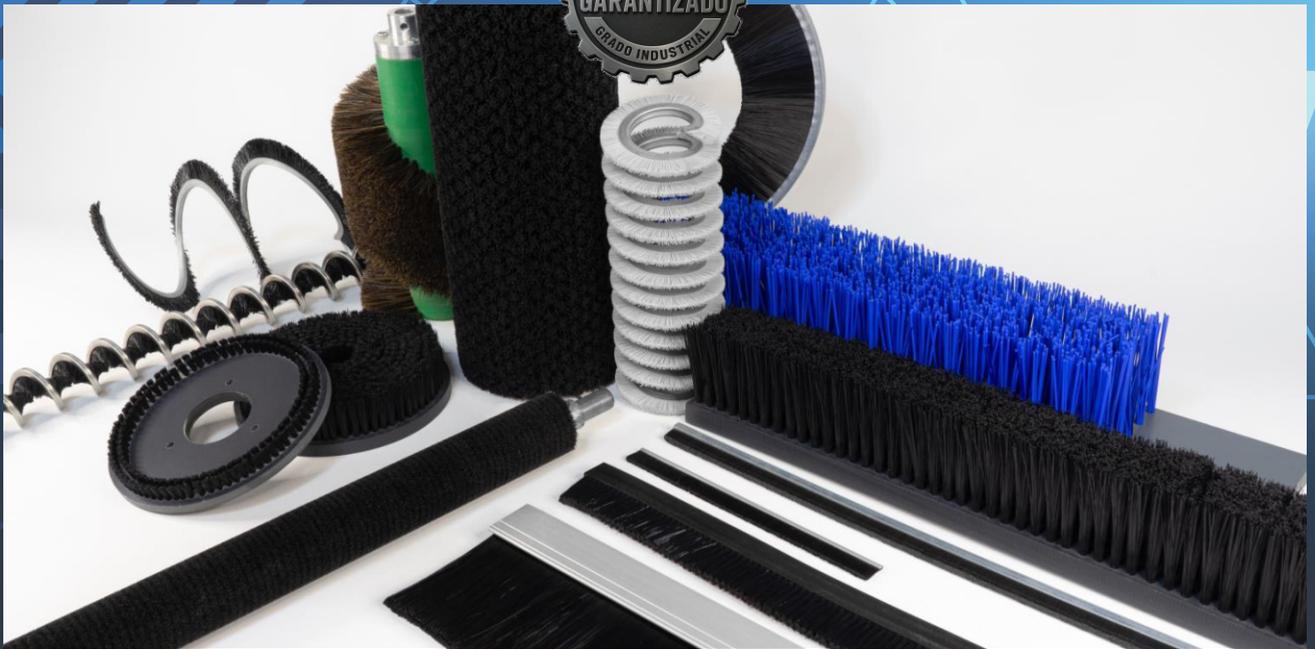

CEPILLOS INDUSTRIALES

WE MANUFACTURE CUSTOM-MADE SOLUTIONS. OEM QUALITY. GUARANTEED.

At Cepillos Industriales Regios, we design, manufacture, and repair high-quality, durable industrial brushes. With over 20 years of experience, we operate a manufacturing plant in Nuevo León and have representatives in Guadalajara, León (Bajío), and Chihuahua.

We focus on offering reliable, custom-made products and providing personalized technical advice. Our commitment is clear: service, quality, and solutions that improve your processes.

WHY CHOOSE US?

100% Domestic Manufacturing: Proudly made in Mexico. - OEM Quality Brushes: Meeting original equipment manufacturer standards. - Total Customization: Fully adapted to your specific needs. - Personalized Service and Urgent Deliveries.

BRUSHES FOR THE AUTOMOTIVE AND AEROSPACE INDUSTRY

Our brushes are designed to cover practically all industries: Automotive and Metalworking, Aerospace, Solar Energy, Food and Beverages, Glass, Electronics, Textiles, and Industrial Cleaning. We offer more than 3,000 industrial brush configurations, manufactured with materials and filaments selected according to each application.

BRUSHES FOR THE AUTOMOTIVE AND METALWORKING INDUSTRY

In the automotive and metalworking sector, our brushes are a key part of production processes. They are used for deburring, cleaning, polishing, transporting, and sealing metal and aluminum parts.

Main Applications:

Controlled deburring of machined or stamped parts. - Cleaning prior to painting or coating. - Removal of burrs and rust from steel or aluminum. - Polishing and fine texturing of surfaces. - Transport and protection of finished parts. - Sealing of racks, booths, or assembly lines.

Ceramic Polishing Discs

Aluminum Oxide End Brushes

Silicon Carbide Roller

Cup Brushes

Brush Mat

Wheel Brushes

Silicon Carbide Wheel

BENEFITS

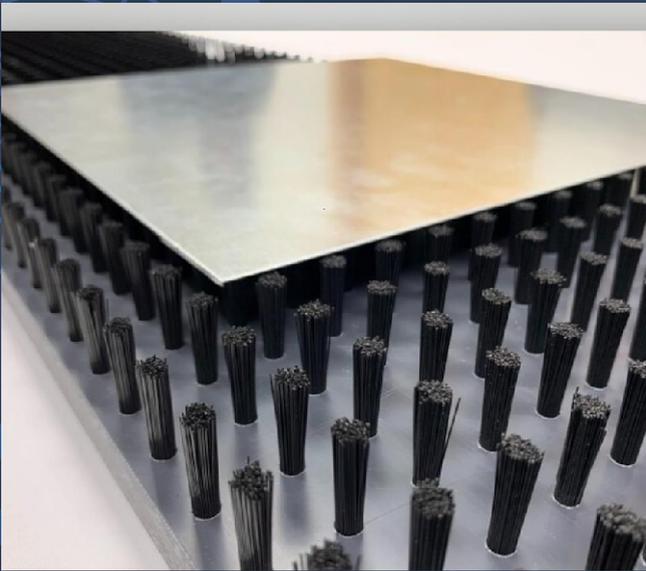

- Zero contamination in paint and welding.
- Reduction of scrap and rework.
- More stable and faster processes.
- Compliance with OEM quality standards.

BRUSHES AND SUPPLIES FOR THE METALWORKING INDUSTRY

Our replacement brush tables offer a wide range of replacement brush panels and brush accessories for the leading manufacturers of CNC, turret, and laser machinery. With decades of experience, we look forward to helping customers solve their scratching problems during the manufacturing process.

ADVANTAGES

- Expert advice for your project.
- Custom-made brushes.
- Optimal selection of bristle types.
- Urgent orders.

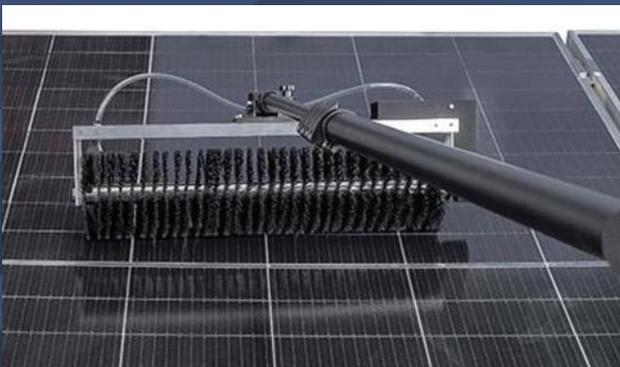

BRUSHES FOR SOLAR PANELS

Brushes designed to clean without scratching the glass of photovoltaic modules. Ultra-fine bristles remove dust, droppings, and residues without damaging the surface. Available in manual or automatic versions, and compatible with water systems or cleaning robots.

ADVANTAGES

- Fast and safe cleaning.
- Increased panel energy efficiency.
- Weather and wear resistant.

Cylindrical Brushes (Rollers)

Manufactured in spiral or inserted form, cylindrical brushes can be adapted to any diameter or length. Minium or silicon carbide, they offer uniform and long-lasting deburring.

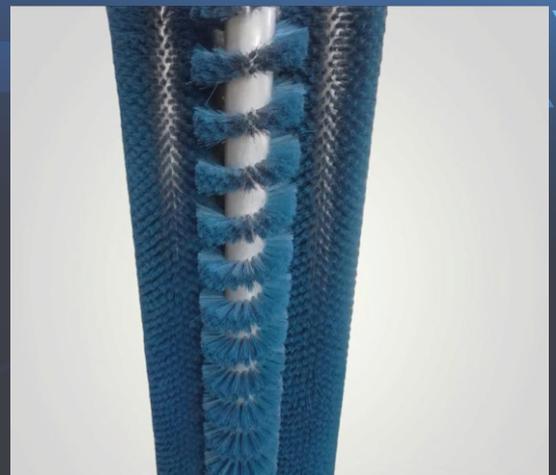

ADVANTAGES

- Cleaning of belts, chains, and conveyors
- Dusting and polishing panels or glass
- Handling parts without scratching

Cylindrical Brushes (Rollers)

Applications for cylindrical brushes include cleaning chains and conveyor belts, removing debris, transporting materials, positioning products, dusting panels, washing glass, cleaning screens, handling materials (such as screws and drill bits), as well as removing lint or washing fruits and vegetables.

Cylindrical Brushes (Rollers)

Manufactured in spiral or inserted form, cylindrical brushes can be adapted to any diameter or length. Cleaning of belts, chains, and conveyors; dusting and polishing of panels or glass; handling of parts without scratching; washing of fruit, vegetables, or glass

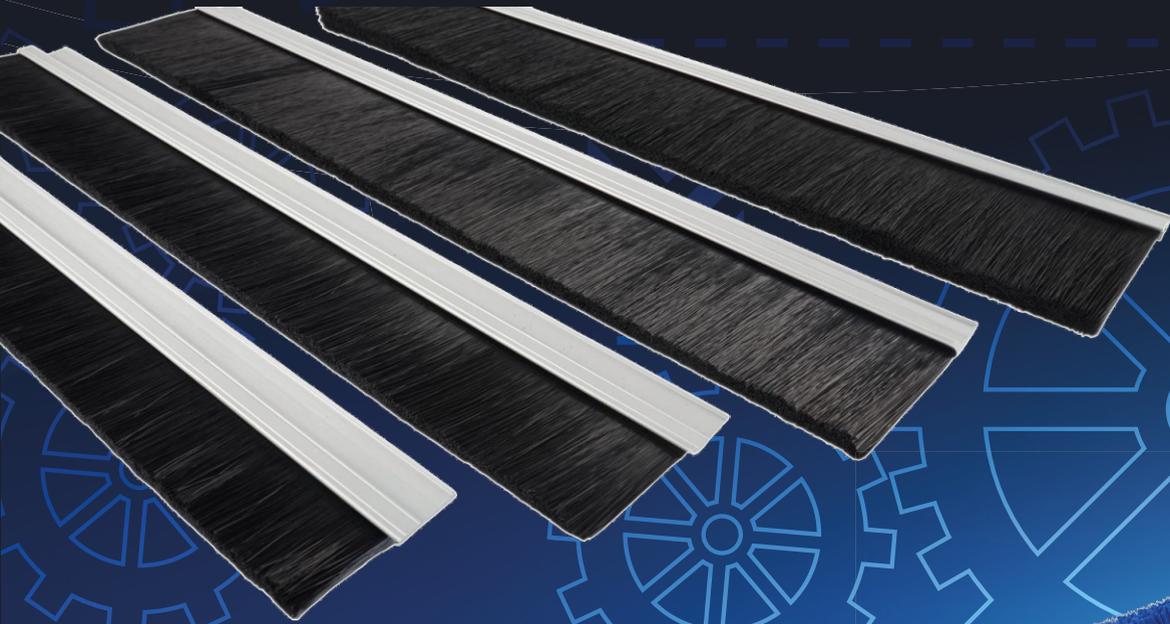

CEIREGIOS

Strip Brushes

We can manufacture any strip brush specifically tailored to your needs. You can choose between a straight strip brush design or a special shape such as circular, rectangular, circular with the bristles on the inside or outside. Our product range includes a variety of materials, from plastic bases, metal bases, nylon bristles, polypropylene, natural horsehair, ixtle, lechuguilla, etc. In a variety of sizes.

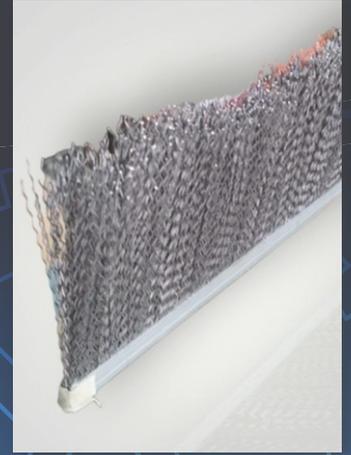

APPLICATIONS

- Sealing doors, racks, or cabins
- Protection against dust and sparks
- Guides for transporting parts or glass

CEPILLOS TIPO TIRA (STRIP)

We manufacture strip brushes in multiple configurations: straight, circular, spiral, or curved, with bristles facing inward or outward.

Materials:

Metal or plastic bases, with nylon, polypropylene, ixtle, lechuguilla, or natural bristles.

STRIP BRUSHES

A circular or disc brush can have several applications, such as sweeping and polishing surfaces and floors, for a variety of brands of sweepers, polishers, and scrubbers. At Cepillos Regios, we can manufacture or repair any of these brushes to fit your machines or your requirements.

The same strip-type brush can also be made in a round, rectangular, or spiral shape, with the bristles on the inside or even on the outside. It can also be a flexible strip that can be used as a cover for CNC routers or for some glass manufacturing machines.

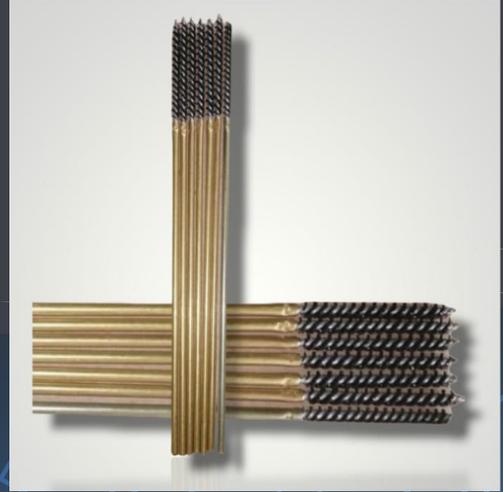

INDUSTRIAL CIRCULAR BRUSHES (DISK TYPE)

Disk-type brushes for sweeping, polishing, or cleaning surfaces and floors. Compatible with sweepers, polishers, and scrubbers from multiple brands.

Materials:

Polypropylene, nylon, ixtle, lechuguilla, or combinations with wire for abrasive use.

INDUSTRIAL BRUSHES

Brushes for cleaning the inside of pipes, bottles, or parts with cavities. Available in wire, nylon, copper, brass, or natural bristle.

USES

- Cleaning pipes and cavities
- Removing rust and internal burrs
- Polishing, filtering, and grinding

BRICK-TYPE BRUSHES

Brick-type brushes or modular blocks for cleaning, roughing, or finishing. Made of nylon, natural bristles, or combinations depending on the required hardness. Designed for individual assembly or automatic equipment.
